

# What size Dance Floor do I need?

## Step 1: Estimate the Number of Dancers

- A good rule of thumb is to assume that half of your guests will be dancing at any given time.
- If you expect a particularly enthusiastic crowd, you may want to assume a higher percentage.

## Step 2: Find Your Ideal Dance Floor Size

- Locate the "Number of Dancers" (or closest number) in the chart below.
- The corresponding row and column will show the length and width of the dance floor in feet.
